Reasons For Allowance

5. The following is an examiner's statement of reasons for Allowance:

Regarding Independent claims 1,21,36 and 38, Applicant's particular method and associated system for dynamically caching Dynamic Multi-sourced Persisted EJB attributes, which includes creating a context definition containing attributes representing collections of source system data, specifying in an attribute caching element whether each attribute in the context definition is to be cached in a persistent data cache, storing the context definition in a persistent data cache, creating an instance of a Dynamic Multi-sourced Persisted EJB, applying the attributes in the context definition to the created instance of the Dynamic Multi-sourced Persisted EJB, accessing cached data by the Dynamic Multi-sourced Persisted EJB instance without requiring EJB compilation and deployment, and bi-directionally synchronizing persistent cache data from clients and from data sources in combination with other limitations of the claims, was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
